## **St Peter's 2020 Architecture Film Season**

These films will be shown over successive Wednesday evenings in the Vicarage at 7.30 pm.

**Concert of Wills: Making the Getty Centre** In some ways the film could have been better entitled "Conflict of Wills." When famous American architect Richard Meier was chosen to build an extensive art gallery overlooking Los Angeles, a project in which money was no object, he could not have foreseen the clash of egos that would follow. Yet the beautiful building that resulted is also very practical. The building's defence systems fought off the recent wildfires that engulfed this part of Los Angeles. **Screens this Wednesday 19 February.**

**How Much Does Your Building Weigh Mr Foster** A somewhat hagiographical film about a British architect with a huge ego but Norman Foster's achievement is undeniable, including Hong Kong airport terminal, Berlin's Reichstag and the London Gherkin. Screens 26 February.

**Strange and Familiar: Architecture on Fogo Island** How a strikingly original work of design helped to sustain a unique way of life on a small island off the coast of Newfoundland, Canada. Screens 4 March.
